
DMP du projet "CEToolbox Software Management Plan"

Plan de gestion de données créé à l'aide de DMP OPIDoR, basé sur le modèle "Research Software Management Plan template (PRESOFT project)" fourni par PRESOFT projet.

Renseignements sur le plan

Titre du plan	DMP du projet "CEToolbox Software Management Plan"
Langue	fra
Date de création	2021-11-09
Date de dernière modification	2021-11-09

DMP du projet "CEToolbox Software Management Plan"

1. Metadata

CEToolbox

The CEToolbox software is an Android application for computing Capillary Electrophoresis parameters. It provides several tabs, each of them providing a simple way to compute specific data, like injection information, viscosity, conductivity or electroosmotic mobility.

Version 1.4.5

2021-03-03

CE Toolbox is free software; it is licensed under the Apache License, Version 2.0.

Physical and Analytical Chemical Sciences

Injection characteristic calculation ; Conductivity ; Flow rate; Mobility; Separation characteristic calculation; Viscosity.

Android Application; Java; Open Source software

Question sans réponse.

2.1 Software context: History

Question sans réponse.

Question sans réponse.

Previous version of CEToolbox are available on this page: <https://github.com/cetoolbox/cetoolbox/releases>

Question sans réponse.

It is planned to modify the user interface to comply with recent UX design. It is also planned to release an iOS version of CEToolbox.

3.1 Software features: Scientific goals

Question sans réponse.

3.2 Software features: Usage and distribution objectives

Question sans réponse.

Laboratory daily work and teaching. The software is TRL9.

The software intends to be used by researchers and engineers who are doing capillary electrophoresis-based analysis.

The support is provided through:

- a complete on-line documentation;
- a ticket system;
- a person in “best effort”.

The software is widely distributed through two application stores :

- Google Play
- F-Droid

-
- Yes

We are looking for developers or software testers.

Human resources are enough for the maintenance of the software, however additional competences would be welcome for specific developments.

No risk analysis has been done so far.

The source code is saved on several sites with version control system. Backup from stable versions are performed on the laboratory storage server. The code is also correctly indexed by the Software Heritage project.

3.3 Software features: Technical features

The software is developed in Java with Android Studio.

The software works with Android and requires the Android SDK.

Question sans réponse.

Equations used by the application are detailed on: <https://cetoolbox.github.io/resources/cetoolbox-equations.pdf>
