

Conseil européen de la recherche (European Research Council, ERC): ERC DMP

Summary

Project Acronym

Project Number

Provide a dataset summary (*Several datasets may be included into a single DMP*)

Recommendations:

This should include:

- dataset reference and name
- origin and expected size of the data generated/collected
- data types and formats

FAIR data and resources

1. Making data findable

Recommendations:

This should consider the dataset description: metadata, persistent and unique identifiers e.g., DOI

2. Making data openly accessible

Recommendations:

- Which data will be made openly available and if some datasets remain closed, the reasons for not giving access?
- Where the data and associated metadata, documentation and code are deposited (which repository)?
- How the data can be accessed? Are relevant software tools/methods provided?

3. Making data interoperable

Recommendations:

Which standard or field-specific data and metadata vocabularies and methods will be used?

4. Increase data reuse

Recommendations:

- What data will remain re-usable and for how long?
- Is embargo foreseen?
- How the data is licensed?
- Any data quality assurance procedures?

5. Allocation of resources and data security

Recommendations:

- Estimated costs for making the project data open access and potential value of long-term data preservation.
- Procedures for data backup and recovery.
- Transfer of sensitive data and secure storage in repositories for long term preservation and curation.
