Conseil européen de la recherche (European Research Council, ERC): ERC DMP

Summary

Project Acronym

Project Number

Provide a dataset summary *(Several datasets may be included into a single DMP)*

Recommandations:

- Dataset reference and name
- Origin and expected size of the data generated/collected
- Data types and formats

FAIR data and resources

1. Making data findable

   Recommandations:
   Dataset description: metadata, persistent and unique identifiers e.g., DOI

2. Making data openly accessible

   Recommandations:

   - Which data will be made openly available and if some datasets remain closed, the reasons for not giving access

   - Where the data and associated metadata, documentation and code are deposited (repository?)

   - How the data can be accessed (are relevant software tools/methods provided?)

3. Making data interoperable

   Recommandations:
   Which standard or field-specific data and metadata vocabularies and methods will be used

4. Increase data reuse

   Recommandations:

   - What data will remain re-usable and for how long

   - Is embargo foreseen

   - How the data is licensed

   - Data quality assurance procedures

5. Allocation of resources and data security

   Recommandations:

   - Estimated costs for making the project data open access and potential value of long-term data preservation

   - Procedures for data backup and recovery

   - Transfer of sensitive data and secure storage in repositories for long term preservation and curation
